SIMONE POLICIANO DELGADO
LUCRECIA HELENA LOUREIRO

The app is a software prototype that is intended to be a tool for assisting nurses in developing customized patient discharge plans. The software content was structured through a bibliographic survey, seeking to facilitate the systematization of care provided by nurses. The software was made available in Portuguese and English versions. The guidelines provided made available are in easy-to-read and understandable language, both for professional and patient, with released and free access, simply access the link provided and download the software on the device's operating system used by the nurse. The first screen of the software is for login and user access password; button to enter system; access for password recovery. In addition of both flags - Brazil and USA - as an option to choose the access language

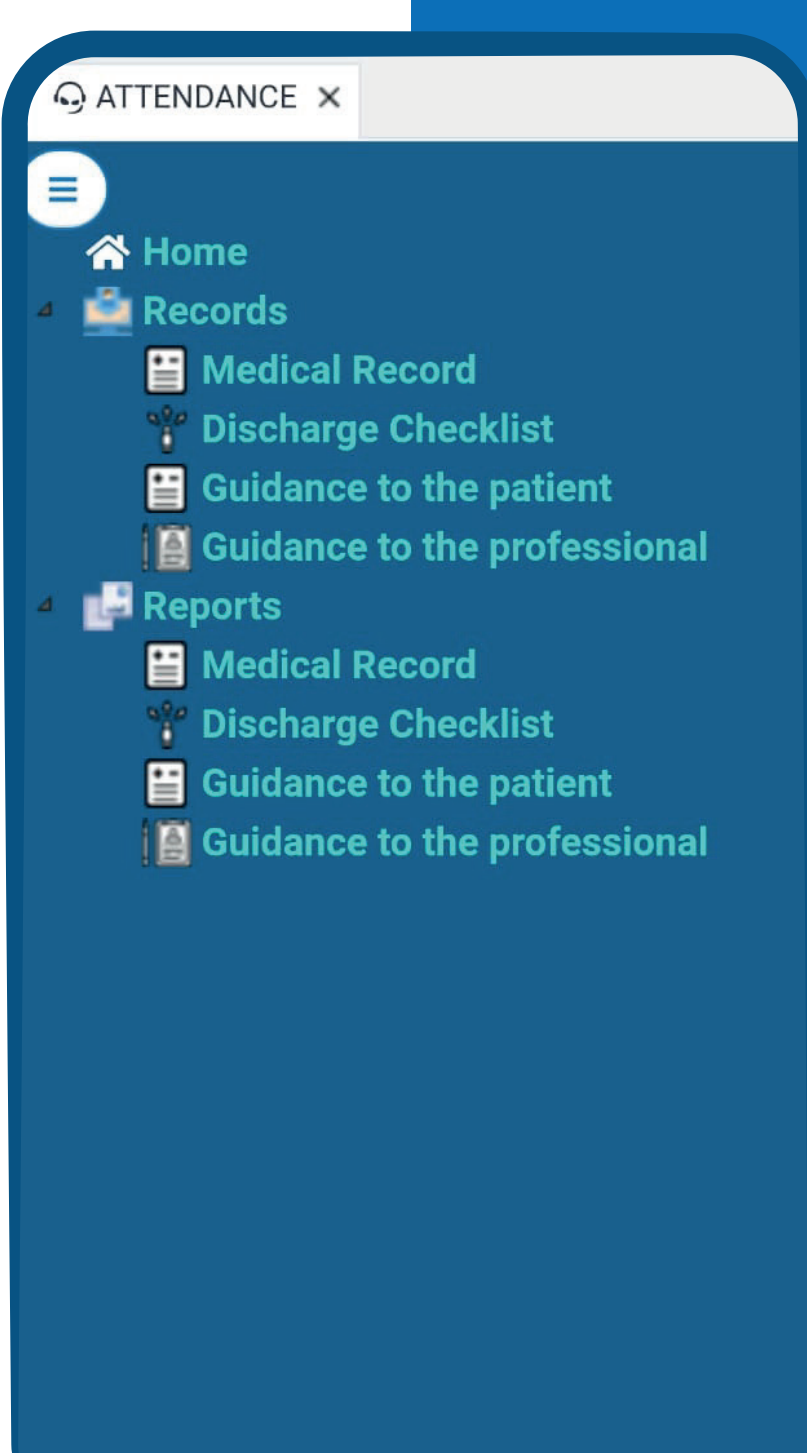

LOGIN

The main screen has six icons: administrative; attendance; statistics; about, security and exit. Each icon is subdivided into tabs.

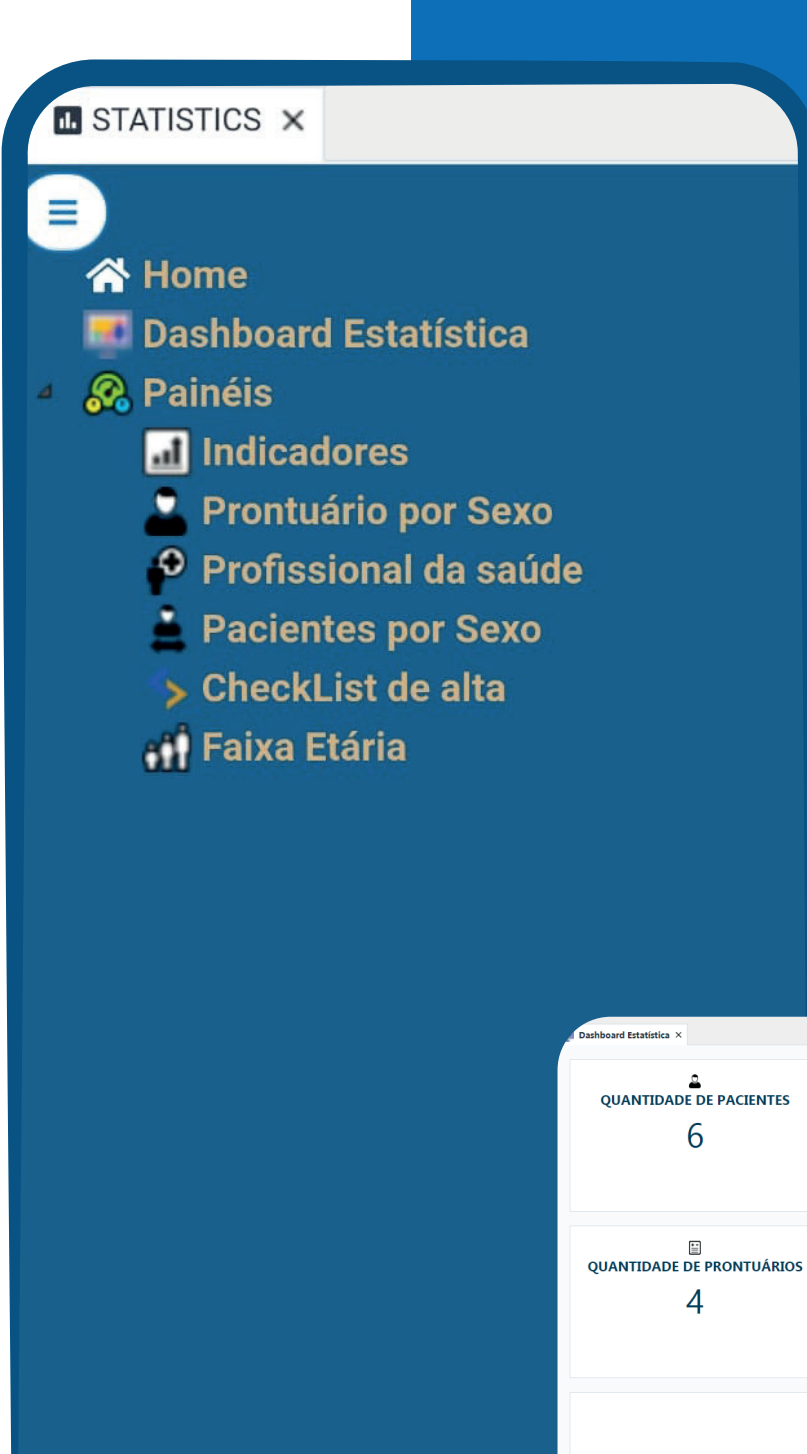

ADMINISTRATIVE

In the "Administrative" icon there are two tabs: register and Reports. In registrations you will find the icons for entering data: company (hospital); patient; types of ostomies; age range of patients, role of the professional who is performing carrying out data collection; legislation for consultation; guidance for professionals and patients. At the icon reports appear statistics and graphs of the added data.

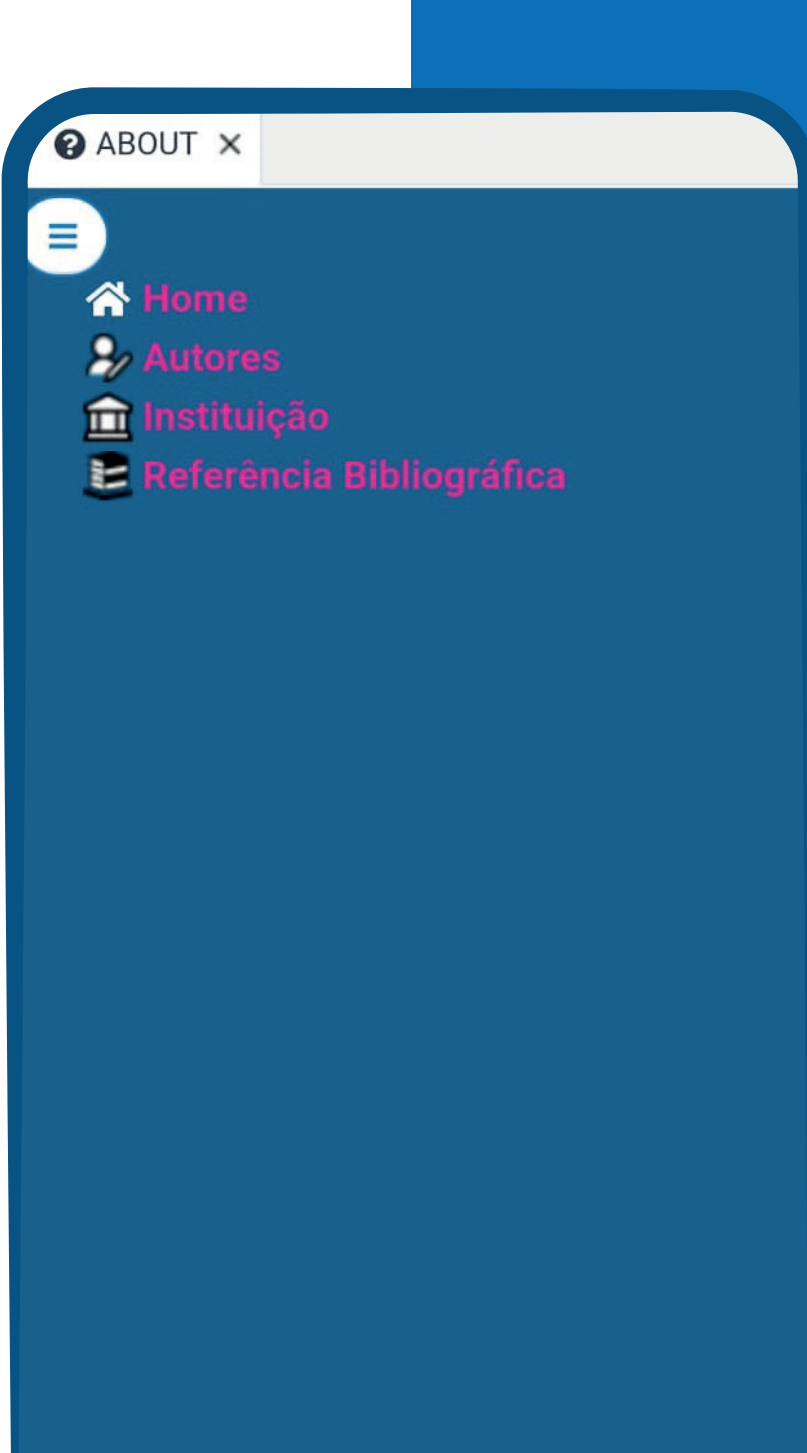

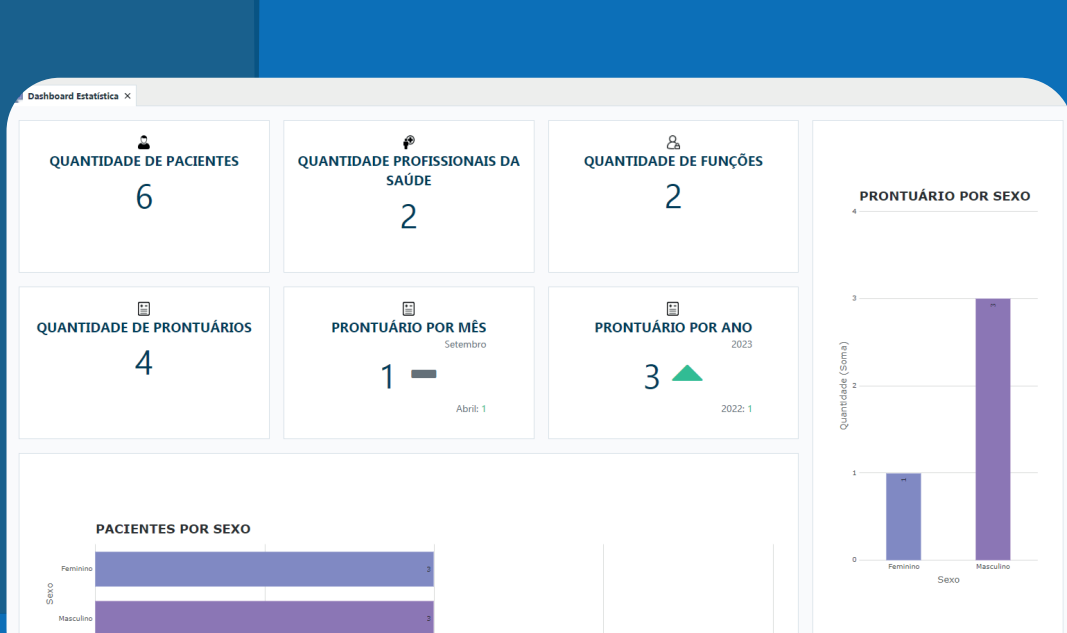

ATTENDANCE

In the "Attendance" icon there are two tabs: Registration and Reports. In registrations there are spaces services for registering medical records; hospital discharge checklist ; guidance to professionals and guidance to patient. In the tab that refers to the reports there are statistics and graphs.

STATISTICAL PANEL

In Statistics contains the statistical Dashboard and panels with indicators. Finishing the system, in the last tab you will find the guide with the main questions and answers to guide the patient and family at the moment ostomy care at home.

ABOUT

In About you will find information about the authors; the research institution and bibliographic references graphics.

SECURITY

In Security you will find user icons; applications; groups; settings and change of the password. Finally, the icon to exit the app.
